

EQS 6.2 for Windows Installation procedures in Windows 8.1

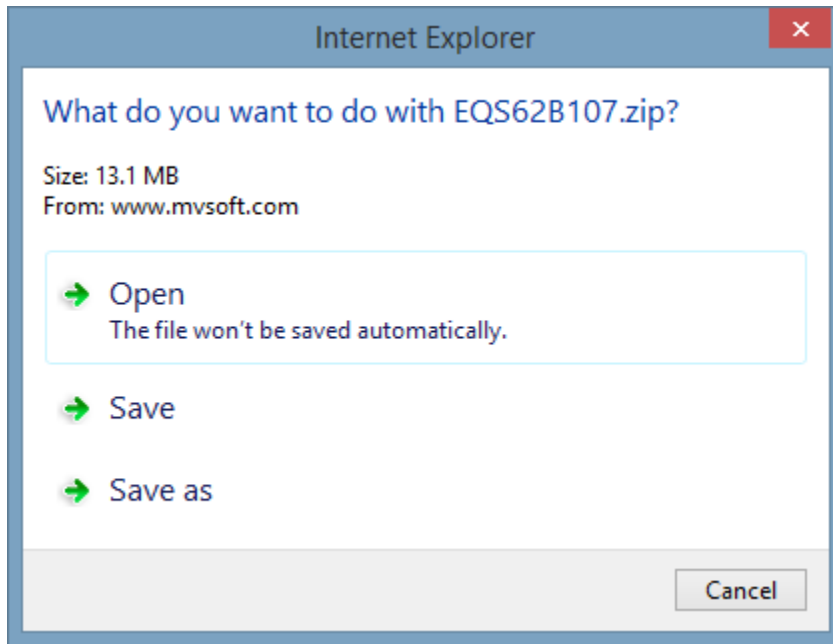

1. This installation is done on Windows 8.1

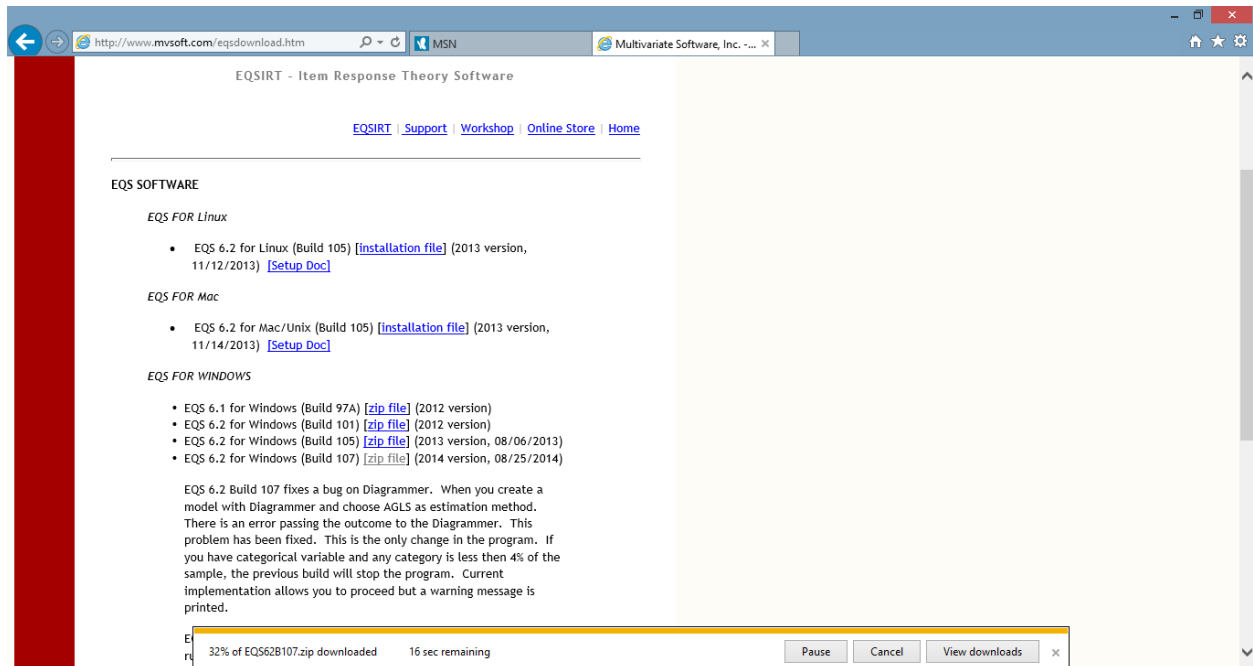

2. Access EQS 6.2 from <http://www.mvsoft.com/eqsdownload.htm> and select Build 107 to download

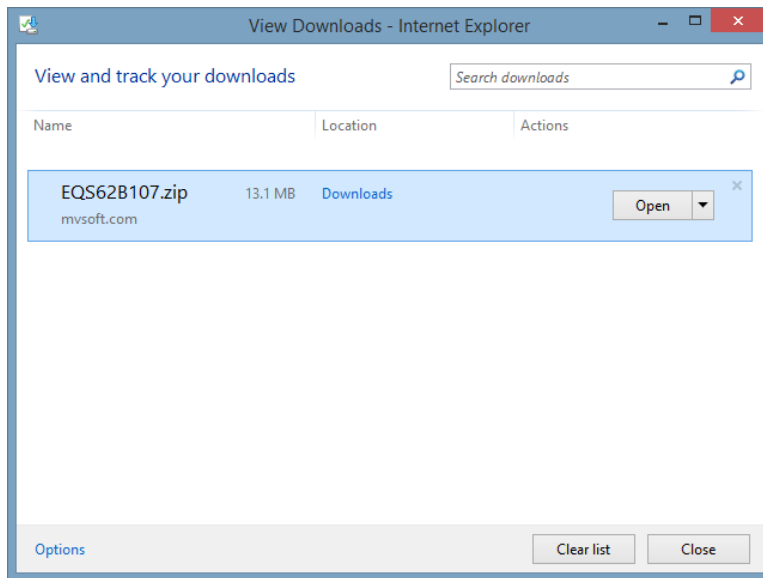

3. You will see the following dialog box and click on Save

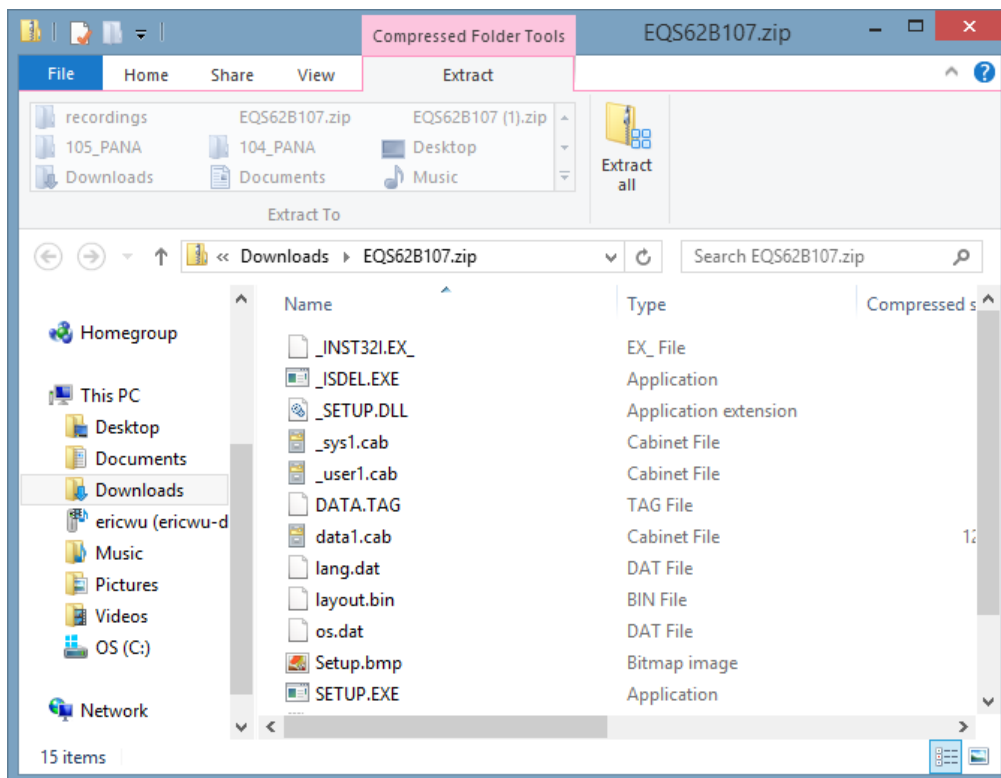

4. At the bottom of the Internet Explorer page, you will see the progress of the download file.

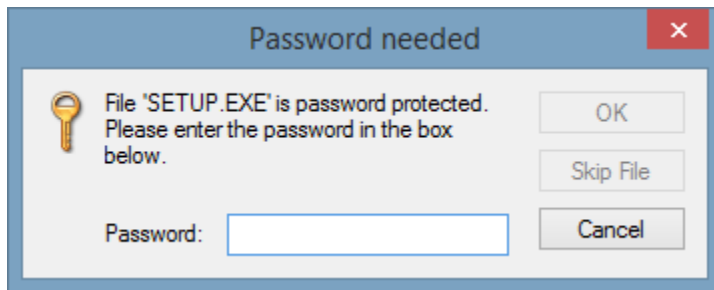

5. After the download is complete, click on the View Download button from previous screen. You will see the following dialog box.

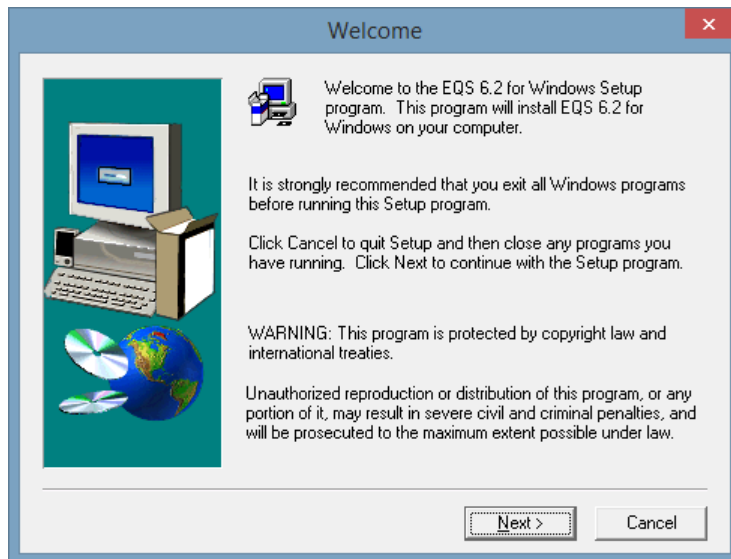

6. Click on the Open box and you will then see the following list. Double click on SETUP.EXE. Depends on your computer, you may need to wait a while.

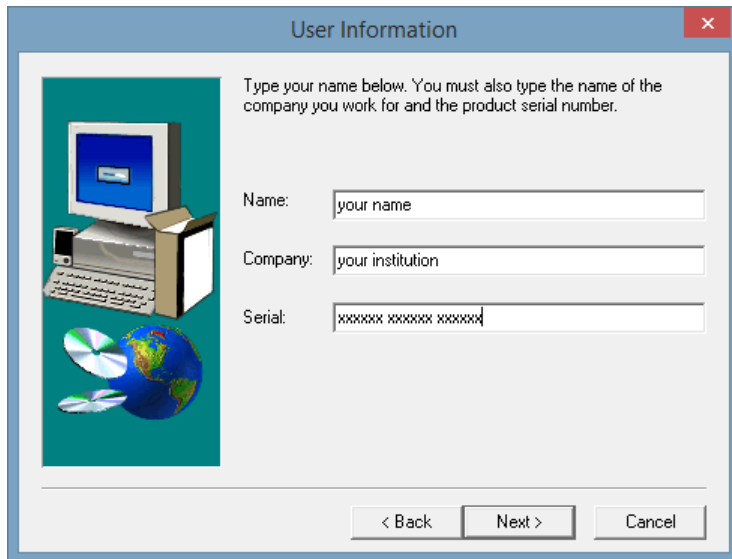

7. You will be asked for a password. Enter the password for the download file. The password is given when the EQS license is purchased.

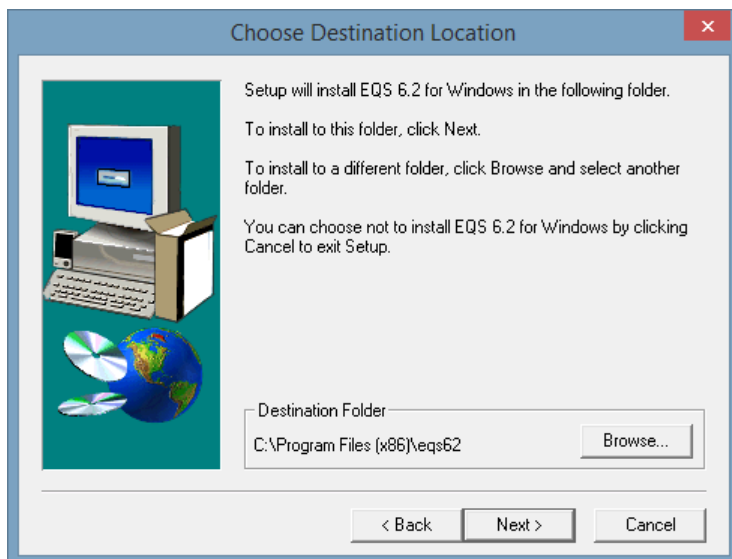

8. EQS 6.2 for Windows setup procedures will be initiated and the following dialog box started (you may need to wait a while for getting this screen).

9. You will be asked for a serial number and then the following dialog box.

Enter the 18 digits serial number you received from Multivariate Software.

10. The installation is complete and an EQS icon will be displayed on your desktop. You are ready to run EQS.

Setup Complete
